
Switch off

More and more salons and spas are trying to do their bit for the environment, and these clever gadgets from Energenie could help do just that.

Its new products include automatic standby plug adapters for appliances such as TV sets, DVDs, computer monitors and home entertainment systems. The other great adaptor for salons is the rundown timer, which switches any appliance off at the mains after 30 minutes. So you'll never have to worry about staff leaving things such as curling irons on again. There is even a radio-controlled socket so you can switch your appliances off from a distance. The products are all Energy Saving Trust certified.
